Histo-Paca publication in Workshop :

Anonymization

INSTRUCTION TO FOLLOW

- In order to be scanned, your slides must meet the following criteria:
 - The label and coverslip must not extend beyond the glass slide
 - The sections must be centered on the slide; any section or part of a section too close to the edges of the slide cannot be scanned!
 - The slides must be cleaned (to avoid a out of focus image!).
- Sections or areas to be scanned should be **circled when the tissue is not clearly visible**.
- Your glass slides must be arranged in the order of your excel list.
- The images will be stored for 6 months on ICEP servers (J:\ or Y:\) and will then be deleted, so remember to make a copy!
- The glass slides must be retrieved within **15 days following the scanning of the slides**
